

Hot Tools

The Ultimate In Woodburning

M.M. NEWMAN
CORPORATION 

Our Famous Woodburner

Our Bestselling Tool Since 1978

Woodburning is the delightful art of burning designs into wood. Introduced in 1978, the Hot Tools' Woodburner is regarded as the premier woodburner on the market today.

This tool is ideal for beginners as well as world-class plaque artists and award-winning decoy carvers. The Woodburner features a lightweight, thin varnished wooden handle that stays cool because the heating element is directly under the tip. This tool reaches 800°F in under two minutes and is available with a wide variety of specialty tips.

Features that work:

- Great for woodburning decoys
- Detailing and design
- Handle stays cool
- 13 specialty tips to choose from

Hot Tools' Woodburning Kit, Dial Temp, and Stand

Hot Tools' Woodburning Kit

The complete woodburning kit contains a Woodburner, Dial-Temp precision temperature controller, 13 different specialty tips, and a stand. Also included is a finely sanded basswood box with an iron-on transfer pattern that can be burned on the lid of the box.

Dial Temp

Featuring a dial on top to adjust tip temperatures from 150°F to full heat, the Dial-Temp controller plugs into any grounded 115 VAC outlet and your tool plugs into the Dial-Temp. It lets you set your own tip temperature.

Stand

The stand provides a handy resting place for any of our tools.

Tips for the Woodburner

Made to Your Exacting Standards for Top Quality Work

Uses for the Woodburner Tips

Our wide selection of tip shapes lets you create precise lines and carve realistic feathers and markings. Here are some suggested uses:

Standard: Makes straight lines and burns in veins on feathers for decoys.

Needle Point: Makes fine lines, dots, and burns holes and intricate details.

Button: Edges are perpendicular to the tip shaft, which makes it easier to reach under the neck or beak of a bird by working at a 90-degree angle.

Circle: This tip is hollowed out to burn a circle with its edges and comes in three sizes.

Round: Round tips also come in three sizes and make a completely blackened circle, rather than an outlined circle.

Multigroove: This tip lets you burn veins and feathers on decoys and is available with 56 lines per inch for medium-size songbirds and 44 lines per inch, which is ideal for larger birds and full-sized ducks.

Lacquer Burn-In Knife

Repairs Wood Finishes with Ease

This wood repair knife comes with an 11/16" wide spatula shaped tip for melting and smoothing lacquer sticks into scratched or gouged wood finishes. Two other sized spatula tips are also available. Seven different colored lacquer sticks are offered and can be mixed together for additional color varieties.

Features that work:

- Repairs any wooden finish
- Spatula tips available in three sizes
- Handle stays cool
- Heats up quickly
- 7 colors offered in lacquer sticks

Foil Transfer Tool

Use to Mark Books, Leather, Paper and More

This tool combines heat and light pressure to let you transfer lettering from foils onto leather, vinyl, paper, cloth, and other materials. This is an ideal way to create a permanent message. Gold, silver, blue, green, and red rolls of foil are available.

Features that work:

- Both fine and broad tips included with the tool
- Easy transfer for permanent marking
- Allows excellent control in lettering
- Heats up quickly
- 5 colors offered in marking foils

Stencil Maker

Easy to Learn, Easy to Handle

Heating up to 425°F in under a minute, the Stencil Maker features a special bent tip that produces a fine, clean cut. Requiring very little pressure, it leaves a beaded edge that resists tearing. Eliminates broken knife blades, torn stencils, and tired fingers.

Features that work:

- Produces a fine beaded edge
- Little pressure required
- Handle stays cool
- Heats up quickly

Stencil Maker Tip

INCLUDED WITH TOOL

Heavy Duty Hot Knife

Hundreds of Uses for Cutting and Melting

Featuring a double-edged copper hot knife tip, this heavy duty hot knife cuts and seals (creates a beaded edge) synthetics such as expandable plastic sleeving, gasketing, sailcloth, indoor/outdoor carpet, and awnings. The tips are resharpenable and slide on directly over the heating element.

Special Features:

- Cuts and seals synthetics
- Leaves a beaded edge
- Handle stays cool
- Heats up quickly

Hot Tacking Tool

The Hot Tacking Tool gives you maximum control to spot tack photos or artwork into position before placement into a heat press. Features a smooth, curved, coated non stick blade.

Features that work:

- Spot tack photos or artwork
- Coated non stick blade
- Handle stays cool
- Heats up quickly

Hot Tacking Tool Tip

INCLUDED WITH TOOL

Archival Tape Remover

The Archival Tape Remover will soften the adhesive from tape when heated. You can then use the sharpened spatula-shaped tip to get under the label or tape and peel it back. You may want to use with the Dial-Temp so that you can control the heat, so as not to scorch the paper or binding.

Features:

- Removes tape or labels from paper
- Cleans up old books or archives
- Heats up quickly
- Tips available in 3 sizes
